**DETAILED ACTION*****Specification***

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

**Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The specification needs to be carefully reviewed and revised to comply with the preferred arrangement (note that the headings are missing).

***Allowable Subject Matter***

Claims 1-4 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: No prior art teaching was found that discloses or suggests a threaded fastener with a deformed locking thread wherein the deformation of the thread is provided on thread portions by radial compression of the thread portions which produces a symmetrical widening of the thread flanks in an outer region and a narrowing or reduction in the thread flank profile in the inner region or base of the thread portion and wherein the deformed thread portions are provided on symmetrically opposite sides of the threaded fastener and each deformed portion extends for approximately one sixth of a thread turn.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references to Hertel et al, Orlomoski, Tabor and Woodward disclose related locking thread devices and are cited to further show the state of the art. The foreign references cited by applicant have not been reviewed (copies were not provided). The single domestic reference cited by applicant has been reviewed.

This application is in condition for allowance except for the following formal matters:

See the above objection to the specification.
